Zuazua DeustoTech Spain Control and stabilisation ofAPDE Wave equations: asymptotic behavior Numerical methods for wave propagation Please contact Chantal Delabarre for (editorial) questions and/or remarks. In case you have difficulties to link the topic of your paper to the area(s) of expertise of one of the Editorial Board members, please submit your paper to: c/o Chantal Delabarre E-mail: aa.delabarre@gmail.com Peer Review Process and Process for Appeals Asymptotic Analysis operates a rigorous, timely, blinded peer review process (with an option for double-blind if requested) by experts in the field. Manuscripts submitted to Asymptotic Analysis will be assessed for suitability for publication in the journal by the Editor-in-Chief. Manuscripts that are deemed unsuitable may be rejected without peer review by the Editor-in-Chief and/or the Associate Editors, and the author will be informed as soon as possible. Manuscripts that are deemed suitable for peer review are forwarded to an Associate Editor with expertise in that area who then recruits appropriate anonymous referees (a minimum of two) for confidential review. Referee reports are then assessed by the Associate Editor, who makes a decision which is then subject to approval of the Editors-in-Chief. Once approved this decision is then conveyed to the author along with the refereeeÁÁÁs anonymized reports. The initial decision will be one of the following: acceptance without revision or potentially acceptable after minor or important reviews. The revised manuscripts will be evaluated by the associated publisher, who could seek the opinion of the referees (first or new) before making a decision, which is again subject to the approval of the publishers in the lead. Once approved, this decision is therefore transmitted to the author together with the anonymous reports of the referee. Once accepted, the manuscripts are normally published online without delay and appear in the next available print number (published quarterly). The editor -in -chief has the utmost responsibility of Cié who is published in the magazine. The authors can appeal to the decisions by contacting the chief editor (to Atà € Editoriale@iospress.com). The authors will be informed in writing of the result of their appeal. The files required for initial sending an .pdf file of the article is sufficient. After an item for publication has been accepted, a modifiable file of the text is required, such as MSPARD or Latex. If you are loading a document that has been accepted for publication or accepted pending minor reviews, upload the files of the document. If you use the latex, use our Latex model and also send a PDF version of the Latex file and separate files of all the figures (if present). See "preparation of manuscripts" for the required file formats. Latex packages must be compiled in .zip or .rar files. The asymptotic analysis of the non- publication commission commissioning a publication commission. Color figures can be had color printed figures, provided that the cost of their reproduction is paid by the author. See the preparation of manuscripts for the required file formats. Open Access Option The IOS Press Open Library offers authors an Open Access (OA) option. Ien Ien itagap onos oloictra'iled enotzarobale id itibedda ilig -atrepa acetoililb alleN .enoisserp-erp oludom Ien ehca .otacilbhub enevI iuc ni onemom lad etnemarebil elilbinopsid .Aras oloictra'I .AO enoizp'oI of an Open Access Fee. Authors will receive an Open Access Order Form upon acceptance of their article. Open Access is entirely optional. See also our website for more information about this option IOS Press Open Library IOS Pre-press This journal publishes all its articles in the IOS Press Pre-Press module. By publishing articles ahead of print the latest research can be accessed much quicker. The pre-press articles are the corrected proof versions of the article and are published online shortly after the proof is created and author corrections implemented. Pre-press articles are fully citable by using the DOI number. As soon as the pre-press article is assigned to an issue, the final bibliographic information will be added. The pre-press version will then be replaced by the updated, final version. PREPARATION OF MANUSCRIPTS Organization of the paper and style of presentation Manuscripts must be written in English. Authors whose native language is not English are advised to consult a professional English language editing service or a native English speaker prior to submission. Manuscripts should be prepared with wide margins and double spacing throughout, including the abstract, footnotes and references. Every page of the manuscript, including the title page, references, tables, etc., should be numbered. However, in the text no reference should be made to page numbers; if necessary, one may refer to sections. Try to avoid the excessive use of italics and bold face. Manuscripts should be organized in the following order: Title page Body of text (divided by subheadings) Acknowledgements References Tables Figure captions Figures Headings and subheadings should be numbered and typed on a separate line, without indentation. SI units should be used, i.e., the units based on the metre, kilogramme, second, etc. Title page The title page should provide the following information: Title (should be clear, descriptive and not long) author's name (s): please indicate who is the complete affiliation of the corresponding author (i) current address of the authors, if different from the complete address of affiliation of the corresponding author, including tel. no., fax n, and abstract of the e-mail address; should be clear, descriptive, self-explanatory and no longer than 200 words, it should also be suitable for publication in the number of keywords for abstraction of services such as table 1, table 2 etc. and refer to all in the text. each table must be provided on a separate page of the manuscript. Tables should not be included in the text. each table should have a short and self-explanatory title, the headers of the columns should be short, but sufficiently explanatory, standard shortcuts of the measuring units should be added in brackets, vertical lines should not be used to separate columns. instead leaves a little extra space between the columns. any essential explanations for the understanding of the table should be given in the notes at the bottom of the table. References must be listed in vancouver style: [1] rose me, huerbin mb, melick j, marion dw, palmer am, schiding jk, et al. regulation of concentrations of interstitial amino acids after injury to the cortical contusion. brain res. 2002; 935 (1-2): 40-6. Proc Natl Acad Sci U S A. In press 2002. [7] Fletcher D, Wagstaff CRD. Organisational psychology in elite sport: its emergence, application and future. Psychol Sport Exerc. 2009;10(4):427-34. doi:10.1016/j.psychsport.2009.03.009. Footnotes Footnotes should only be used if absolutely essential. In most cases it is possible to incorporate the information in the text. If used, they should be numbered in the text, indicated by superscript numbers and kept as possible. Figures Number figures as Fig. 1, Fig. 2, etc and refer to all of them in the text. Each figure should be provided on a separate sheet. Figures should not be included in the text. Colour figures can be included, provided the cost of their reproduction is paid for by the author. For the file formats of the figures please take the following into account: Line art should be have a minimum resolution of 600 dpi, save as EPS or TIFF Grayscales (incl photos) should have a minimum resolution of 300 dpi (no lettering), or 500 dpi (when there is lettering); save as tiff Do not save figures as JPEG, this format may lose information in the process Do not use figures taken from the Internet, the resolution will be too low for printing Do not use colour in your figures if they are to be printed in black & white, as this will reduce the print quality (note that in software often the default is colour, you should change the settings) For figures that should be printed in colour, please send a CMYK encoded EPS or TIFF Figures should be designed with the format of the page of the journal in mind. They should be of such a size as to allow a reduction of 50%. On maps and other figures where a scale is needed, use bar scales rather than numerical ones, i.e., do not use scales of the type 1:10,000. This avoids problems if the figures need to be reduced. Each figure should have a self-explanatory caption. The captions to all it must be typed on a separate manuscript sheet. Photographs are acceptable only if they have a good contrast and intensity. Copyright Copyright of your article The authors who present a manuscript do it for reading and agreed the terms of the author of the press author iOS. Citing an author from other publications, when he cites someone else's work or when considering the reproduction of figures or table from a book or newspaper, he should make sure that he is not violating a copyright. Although in general an author can mention from other published works, he should obtain authorization from the copyright owner if he wishes to make substantial extracts or reproduce tables, plates or other figures. If the copyright owner is not the author of the aforementioned or reproduced material, it is recommended that the authorization of the author is requested. Even the material in unpublished letters and manuscripts is protected and must not be published unless the authorization has not been obtained. The presentation of a document will be interpreted as a declaration that the author has obtained all the necessary permit. It is always necessary to always carry out an adequate recognition of any material borrowed. Evidence that the corresponding author receives a PDF test and is asked to carefully check this test (the publisher performs only a cursred control). The corrections other than the printer errors, however, should be avoided. The costs deriving from these corrections will be charged to the authors. Buy how to order reprints, a pdf file, magazines or print books iOS the corresponding author of a contribution to the magazine receives a copy of a free PDF author of the article, unless otherwise indicated. This PDF copy is filtered and only for personal use. A free pdf copy did not be provided for procedures for conferences and problems An order form for a free, reprint or additional PDF fileThe copies will be provided together with the PDF test. If you want to order the reprints of a previous published article, please contact the publisher for a quote. IOS Print, fax: +31 20 687 0019. Email: editorial@iospress.nl An author is entitled to 25% discount on IOS Press books. See the author's discount (25% on all the publications of the book iOS Press. Kudos the authors of published articles (non-performance, final articles) will be contacted by Kudos. Kudos is a service that helps researchers to maximize the impact and visibility of their research. It allows authors to enrich their articles with secular metadata, add links to related materials and promote their articles through the Kudos system to a larger audience. The authors will not receive more than three emails: an invitation and a maximum of two reminders to register for the service and connect the item published to their profile. The use and registration for Kudos remains completely optional. For more information, please take a look at our authors section. How do you want some episodes on how to help your research to reach a larger and greater impact? Please consult our promotional toolkit for the authors for suggestions. advice.

2022-7-12 · In quantum mechanics, Schrödinger's cat is a thought experiment that illustrates a paradox of quantum superposition.In the thought experiment, a hypothetical cat may be considered simultaneously both alive and dead as a result of its fate being linked to a random subatomic event that may or may not occur.. This thought experiment was devised by physicist ... 2022-7-8 · In mathematics, a hyperbola (/ h a t ' p ɜː b ə l ə / (); pl. hyperbolas or hyperbolae / ɪ iː / (); adj. hyperbolic / , h a t p ər ' b ə ɪ l ɪ k / ()) is a type of smooth curve lying in a plane, defined by its geometric properties or by equations for which it is the solution set. A hyperbola has two pieces, called connected components or branches, that are mirror images of each other ... 2022-7-10 · download In computer networks, to receive data from a remote system, typically a server such as a web server, an FTP server, an email server, or other similar systems. This contrasts with uploading, where data is sent to a remote server. A download is a file offered for downloading or that has been downloaded, or the process of receiving such a ... 2022-7-2 · In biology, a substitution model, also called models of DNA sequence evolution, are Markov models that describe changes over evolutionary time. These models describe evolutionary changes in macromolecules (e.g., DNA sequences) represented as sequence of symbols (A, C, G, and T in the case of DNA).Substitution models are used to calculate the ... 2022-7-11 · Woody Allen - American screenwriter, director, actor, comedian, author, playwright, and musician; David Cronenberg - Canadian filmmaker, screenwriter and actor, one of the principal originators of what is commonly known as the body horror or venereal horror genre; Stanley Donen - film director and choreographer whose most celebrated works are Singin' in ... 2022-7-7 · General information; General definition = Fields of application: Probability, thermodynamics; Domain. Codomain and Image; Domain: Image (/Basic features; Parity 2022-7-8 · The 1980s were years of relative consolidation. C++ combined object-oriented and systems programming. The United States government standardized Ada, a systems programming language derived from Pascal and intended for use by defense contractors. In Japan and elsewhere, vast sums were spent investigating the so-called "fifth-generation" languages that ... 2022-7-8 · In mathematical analysis, asymptotic analysis, also known as asymptotics, is a method of describing limiting behavior.. As an illustration, suppose that we are interested in the properties of a function f (n) as n becomes very large. If f(n) = n 2 + 3n, then as n becomes very large, the term 3n becomes insignificant compared to n 2.The function f(n) is said to be "asymptotically ... 2022-7-15 · About 68% of values drawn from a normal distribution are within one standard deviation σ away from the mean; about 95% of the values lie within two standard deviations; and about 99.7% are within three standard deviations. This fact is known as the 68-95-99.7 (empirical) rule, or the 3-sigma rule.. More precisely, the probability that a normal deviate lies in the range ... 2022-7-13 · The technological singularity—or simply the singularity —is a hypothetical point in time at which technological growth becomes uncontrollable and irreversible, resulting in unforeseeable changes to human civilization. According to the most popular version of the singularity hypothesis, called intelligence explosion, an upgradable intelligent agent will ...
